

**VSI recognizes** an individual as a Certified Installer based on a combination of work experience and successful completion of a course of training and/or an examination on the proper method for installing vinyl siding, soffit, and accessories. Certification is valid initially for two years, then three years upon recertification.

VSI recognizes an individual as a Certified Trainer if he or she: (a) has relevant work experience, (b) successfully completes a course of training and examination based on the body of knowledge and applied skills needed to teach others how to properly install certified vinyl siding, soffit, and accessories and (c) actively trains installers and refreshes these skills. Certified Trainers are reviewed and their certification renewed periodically.

We take personal pride in our employees accomplishments and knowing that you, as a potential client, can trust us and our work completely. You can find our VSI Certified Installers on the official list of certified individuals at:
